

TIPS AND BEST PRACTICES FOR 'GTCF MOBILESCAN' AT NACAC EVENTS:

Here are a few tips for having the best app experience:

- **Concerned about battery?** Switch to low power mode in your phone settings.
- **Using Rapid Scan?** Tap 'done' every ten scans or so. Don't close the GTCF MobileScan app without hitting 'done' when using rapid scan.
- **'Camera not authorized'** can be corrected in your phone settings.
- **Test Barcode** found on the quick start guide can be used to test your app.
- **'Duplicate Scan'** message can result from quick scanning. Don't worry! When you tap 'update' you are not deleting any data, just adding info to the previous scan. All notes etc. will persist.
- **Updating the App?** Be sure to upload your leads first.
- **Upload your leads** at the end of each event or session.

For more information, take a picture of this QR with your phones camera. You will be automatically routed to the video tutorial for the scanning app.
